01 DATING FAILURES. THE HEADLINE FINDING OF THIS ANNEX

SIX ITEMS READ AS CURRENT AND ON-POINT. ALL SIX ARE YEARS OLD. ALL SIX WERE EXCLUDED.		
ITEM	APPEARS TO BE	VERIFIED AS
"5 of 7 carjackings in the neighborhoods ringing Lake Harriet, Nov 14 to 25"	In window	November 2021. Corroborated by Axios Twin Cities (9 Nov 2021), MinnPost (Nov 2021) and the Star Tribune 2021 carjacking map [S]
MPD 5th Precinct alert: victims "alone or with one other person, either walking"	Current, and precisely the profile in question	Attributes the warning to Inspector Katie Blackwell , who left that command in August 2023 . Also names Lowry Hill East and Whittier
Lake Harriet band shell shooting	"October 2026" per a search summary	24 October 2023 per charging records. The same summary described a completed murder where nobody was injured
"Police report rise in crime along Lake Nokomis, Minnehaha Creek"	A current warning, on a creek that runs past this lake	February 2021
"Three arrested after string of robberies in Uptown"	In window	September 2024
Linden Hills, "13 larceny and theft offenses, highest month in the past year"	An August 2026 local trend marker	The Patch article dates to 2022. This one reached two published revisions of the main assessment before being caught
PI assesses date verification, not collection volume, as the binding constraint on this assessment. Every one of the six would have passed a casual read, and each described exactly the kind of incident the owner asked about. Search result summaries proved unreliable on dates in particular: they attach a current frame to old reporting. The rule that caught all six is the same one Section 04 imposes on the forum layer. Capture the event date first, then decide whether the item counts.		

02 IN-WINDOW MEDIA RECORD WITHIN THE RADIUS

DATE	ITEM	SOURCE	BEARING ON THE RUN

Nothing in-window was located on or beside the Lake Harriet parkway. No assault, robbery, or exposure report on the lake path appeared in any accessible source across the full 365 days, searched by the parkway name, the band shell, the boat launch, the rec center, MPRB Park Police incident summaries, and neighborhood press. That is a genuine null result and it is reported as one, not as a clean bill of health.

03 SENTIMENT

The lake reads as safe and heavily used, and the dominant public complaint is crowding rather than danger. The Lake Harriet loop trail carries more than 1,600 public reviews, with usage repeatedly described as heavy. A corridor that residents avoid does not generate that pattern. Coverage of the break-in wave captured the counter-current in the ring neighborhoods: <i>"We think we live in a bubble here, but I guess not." Linden Hills resident, after a neighborhood break-in</i> One national piece (NBC, citing FBI framing) notes assaults on runners frequently occur in <i>daylight</i> and taper in early-morning hours. PI retains it rather than discarding it, and notes it cuts against the darkness intuition. It is national and general, and it is not evidence about this parkway. [A]	The neighborhood's own 2026 civic agenda is not about crime, and PI assesses that as a meaningful negative indicator. Lynnhurst Neighborhood Association and Southwest Voices coverage through the year centers on the Lynnhurst Park master plan and the proposed removal of the wading pool, the Oliver Avenue storm sewer works, Penn Avenue bridge redecking, and Porchfest on 25 June. Residents organising around park amenities and construction, rather than around safety, is what a low-threat neighborhood looks like from the inside. [A] Southwest Voices is the best local source identified. It covers East Harriet, Lynnhurst, Fulton and Linden Hills by name, works from City of Minneapolis data, and holds an explicit anti-fear-mongering editorial stance. Per Section 01, its article dates must be checked individually rather than trusted from a search summary.

04 RESIDENT-FORUM LAYER. NOT COLLECTED

This layer is entirely open and nothing in this annex covers it. Two separate barriers, and the second is not specific to this environment: • Nextdoor is behind a login wall. No authenticated session is available here, and nextdoor.com is blocked at the network policy. • Reddit refuses Anthropic's crawler outright. A domain-restricted search returns a hard refusal naming the user agent: <i>"The following domains are not accessible to our user agent: [reddit.com]."</i> No Claude session can reach Reddit. Only the owner's own browser can. Nextdoor, logged in, 55419: Lake Harriet Parkway · runner · jogger · prowler · car break-in · window smashed · package · porch · suspicious · catalytic Reddit, owner's browser: site:reddit.com/r/minneapolis Lynnhurst · "Lake Harriet" safe · "Lake Harriet" running · site:reddit.com/r/TwinCities "East Harriet" Capture rule. Record the event date and whether the account is firsthand or a repost for every hit. In window and firsthand, retain. Older than the window, or hearsay, discard. Section 01 is what happens when that rule is not applied at collection time. This layer is the one source that would surface incidents too small to reach the press, which is precisely the gap the Section 02 null result leaves open.

Scope. FINAL applies the same two filters as the main assessment: event date between 14 Sep 2025 and 14 Sep 2026, and location within approximately 5 miles of the subject address. Publication date never qualifies an item. Distances are estimated from street geography. Revision C holds the earlier neighborhood-scoped version and the pre-window historical record, including the September 2015 parkway assault at 05:30, the July 2017 escalation series on this lake, and the November 2020 jogger strike on this parkway, none of which qualify under these filters.

Source tags. [V] verified primary · [S] reliable secondary · [A] analysis · [?] gap. Consumer crime-score aggregators (CrimeGrade, AreaVibes, NeighborhoodScout, Niche, Safemap, SpotCrime, HomeSnacks, minneapoliscrime.com) returned mutually inconsistent neighborhood figures and are excluded throughout. Several surfaced repeatedly during collection and were discarded rather than used.

Standing caveat. Absence of coverage is not confirmation of safety. Media sentiment measures what was reported and discussed, not what occurred. The Section 02 null result is the absence of a report, not the absence of an event.
