

Residential Threat Assessment

4889 East Lake Harriet Parkway, Minneapolis, Minnesota 55419. Personal residential due-diligence. Principal question: whether a solo run on the parkway at 05:30 is safe.

DOCUMENT PI-2026-RSA-001 · Rev C	WINDOW 14 Sep 2025 to 14 Sep 2026	ISSUED 14 Sep 2026	RISK TIER Tier 3 · MODERATE	GEOGRAPHIC SCOPE Home and neighborhood
-------------------------------------	--------------------------------------	-----------------------	--------------------------------	---

01 EXECUTIVE SUMMARY

TIER 3 · MODERATE · COMPOSITE 36 / 100

The residence is low risk and the run is where the risk sits. **Zero violent incidents occurred on or beside the Lake Harriet parkway inside the assessment window.** The in-window local record consists of property crime and one serious vehicle collision. Rev C narrows the evidence base to the home, the parkway and the four neighborhoods ringing the lake, at the owner's direction: every citywide, statewide and national figure carried in Rev B has been removed. **The composite did not move.** It held at 36 on local evidence alone, which is a more durable result than the Rev B score that leaned on citywide trend lines. Removing the pre-dawn run drops it to 26, Tier 4 LOW.

02 SITE AND JURISDICTION [V]

Structure	~7,606 sq ft, built 2020 on a 1907 teardown
Marketed value	\$3.7M to \$4.9M, multiple 2025 and 2026 MLS numbers
Neighborhood	Lynnhurst and East Harriet boundary
Ring neighborhoods	East Harriet, Lynnhurst, Fulton, Linden Hills
Residence policing	MPD 5th Precinct, Inspector James Novak
Parkway policing	MPRB Park Police
Ward	Ward 13, CM Linea Palmisano

The jurisdictional split is the most consequential fact in this assessment. The residence sits under the Minneapolis Police Department. The running surface does not. Lake Harriet and its parkways are Park Board property patrolled by MPRB Park Police, whose Park Patrol Agents concentrate on lakes and parkways *during summer months* (MPRB, Park Police and Safety). A pre-dawn run in winter sits at the thinnest point of both coverages at once. PI assesses this seam as the structural driver of the Section 05 score. No data request addressed to MPD alone will describe it, which is why Section 09 calls for two.

03 NEIGHBORHOOD CRIME PICTURE, IN WINDOW

The in-window local record is **property crime plus one serious collision**. No violent person-on-person offense was located on the parkway or its adjoining blocks. Scope is the home, the parkway and the four ring neighborhoods. Every incident below was individually date-verified.

DATE	INCIDENT	LOCATION	BEARING ON A RUNNER
10 May 2026	Resident returned from a weekend trip to a smashed car window, nothing taken. Further break-ins reported the same Sunday in Kenny and Armatage, immediately south (WCCO / CBS Minnesota, 10 May 2026)	Lynnhurst, the subject's own neighborhood	None direct. Parked vehicle
1 May 2026	Stolen Hyundai carrying three people ran a stop sign at 80 mph with its headlights off and struck a State Patrol squad. Trooper sustained a fractured fibula and fractured scapula. A passenger sustained a compound leg fracture and a significant brain bleed. Driver, 19, arrested fleeing on foot (Southwest Voices; FOX 9; KSTP, May 2026)	East Harriet, W 46th St and Aldrich Ave S	Direct. Vehicular, on residential streets in the neighborhood
27 Apr 2026	MPD reported more than 30 vehicles damaged on the city's south side within an eight-hour span (CBS Minnesota, Apr 2026)	South Minneapolis, includes the ring	None direct
Aug 2026	13 larceny and theft offenses recorded, the highest single month in the preceding year per the MPD Crime Dashboard (Patch, Southwest Minneapolis)	Linden Hills, adjacent	None direct. Local trend marker
2025 to 2026	Overnight vehicle window-smashing reaches Linden Hills, northwest of the lake. MPD 5th Precinct investigations attributes the pattern to a single juvenile group active citywide (Star Tribune; KSTP)	Linden Hills, adjacent	None direct. Proximity only
13 Jul 2026 onward	Storm sewer reconstruction on Oliver Ave between W 50th St and Lake Harriet Parkway , and on W 50th St between Oliver and Penn. Scheduled to complete next summer (Southwest Voices; City of Minneapolis)	On the route corridor	Direct. Footing, lighting, detours

PI assesses the 1 May collision as the most underweighted item in the prior revision. A person on foot in this neighborhood is more plausibly injured by a stolen vehicle driven at speed without lights than by an assault. The offender population overlaps the vehicle-break-in crews, but the mechanism and the consequence are different, and the earlier rule that property crime does not touch the running risk holds for smashed windows and fails here. [A]

04 INCIDENT HISTORY ON AND BESIDE THE PARKWAY, OUTSIDE THE WINDOW

Retained for pattern only. None of the following is counted as current. Each is dated because three separate claims reviewed for this assessment turned out to be misdated (Section 08).

DATE	INCIDENT	WEIGHT ASSIGNED
Sep 2015	Solo runner grabbed from behind and briefly chased at 05:30 , West Lake Harriet Parkway near Sheridan Ave S (WCCO / CBS Minnesota)	Exact time, place and activity match. Single point, over 10 years old. Establishes feasibility, not frequency
Jul 2017	Roughly 9 indecent-exposure and grab reports across the Harriet and Nokomis corridor over several weeks. On 12 July a man knocked a woman off her bicycle and assaulted her. Four days later a man grabbed two women (CBS Minnesota)	Escalation pattern in this corridor: exposure to contact to assault, inside one month

5 Nov 2020	Minivan left the roadway on Lake Harriet Parkway at about 16:30, struck a jogger, and entered the lake. Driver had an apparent medical emergency. Neither seriously hurt (Star Tribune; Southwest Journal; FOX 9)	Precedent for vehicle-strikes-runner on this exact surface. Not criminal, still the mechanism
Nov 2021	Five of seven carjackings in the ring neighborhoods occurred between 14 and 25 November (Southwest Voices)	Withdrawn from scoring. Misdated as in-window in Rev A. See Section 08
Apr 2023	Two vehicle-based robberies minutes apart, midday, 4500 block Aldrich Ave S (CBS Minnesota)	Midday and vehicle-borne. Not pre-dawn relevant
24 Oct 2023	Man fired several shots at an MPRB Park Police officer at the Lake Harriet band shell boat launch shortly before midnight. Neither injured. Attempted second-degree murder charged. Park Police chief called the location "extremely isolated" (CBS Minnesota; Star Tribune; KFGO)	The isolation characterisation is the durable finding and carries forward into Section 05
Sep 2024	Two juveniles snatched a purse from the floor beside a diner at Turtle Bread, in daylight with traffic passing and tables occupied (CBS Minnesota, 6 Sep 2024)	Shows daylight and occupancy are not by themselves deterrents in the ring

05 SCORED MATRIX, LOCAL EVIDENCE ONLY

Factors score 0 to 100. Category score is the unweighted mean of its factors. Composite is the weighted sum. Factors carrying an unresolved collection gap are scored conservatively and marked [?]. Category B was re-based for Rev C on neighborhood evidence alone, and two factors were added to reflect Section 03.

FACTOR	SCORE BASIS
A · SITE AND PROPERTY	31 Weight 25% · contributes 7.75
Structural and occupancy baseline	15 2020 construction, owner-occupied single family [V]
Target appeal: publicly marketed high-value residence	55 Full interior photography indexed against a named address [A]
Perimeter and approach exposure	24 Parkway frontage, open lakeside approach [A]
Ownership and occupancy record clarity [?]	30 Aggregator 2018 sale conflicts with active 2025 and 2026 re-listings
B · THREAT INTELLIGENCE, NEIGHBORHOOD ONLY	32 Weight 32% · contributes 10.24
Ambient neighborhood violent crime	10 Among the lowest-crime areas of the city [S]
In-window local property-crime pattern	55 Lynnhurst hit directly 10 May 2026; Linden Hills August peak [V]
Verified in-window violent incidents at or beside the subject	8 None located. Floor reflects reporting gaps, not certainty [?]
Historical activity-matched precedent on the parkway	42 Sep 2015 exact match plus the Jul 2017 escalation series [V]
Local vehicular threat on or near the route [NEW]	45 1 May 2026 East Harriet collision; Nov 2020 parkway strike [V]
C · VULNERABILITY AND ENVIRONMENTAL	42.6 Weight 43% · contributes 18.31
Activity exposure: solo, pre-dawn, full darkness	60 No companion, no witnesses, seasonal darkness for the whole run [A]
Route predictability	55 Fixed route at a fixed time. The most controllable factor scored [A]
Patrol coverage seam	48 MPD and MPRB boundary, Park Patrol weighted to summer [V]
Lighting and sightlines [?]	42 Unverified. Scored conservatively pending physical recon
Active construction on the route corridor [NEW]	40 Oliver Ave and W 50th St works, Jul 2026 through summer 2027 [V]
Offender-presence window overlap	28 Break-in crews operate 02:00 to 07:00. Encounter, not violence [A]
Communications and response	25 Populated residential corridor, carry-phone assumed [A]
COMPOSITE (0.25 × 31) + (0.32 × 32) + (0.43 × 42.6)	36 TIER 3 · MODERATE

Two tests, both passed. Scope test: Rev B scored 36 with citywide and statewide inputs carrying part of Category B. Rev C removed all of them and re-based B on neighborhood evidence alone. The composite held at 36. A score that survives the removal of its broadest inputs rests on the local record, not on background noise. **Sensitivity test:** hold A and B constant and reduce C to its ambient environmental residue of roughly 18, which is what remains once activity exposure, route predictability, construction and the offender window fall away and the patrol seam stops applying to a resident indoors at 05:30. The composite becomes $(0.25 \times 31) + (0.32 \times 32) + (0.43 \times 18) = 26$, which is **Tier 4 LOW**. One behavior moves this assessment across a tier boundary. Nothing else in the matrix does.

06 BANDING

COMPOSITE	TIER	LABEL
81 to 100	1	CRITICAL
61 to 80	2	HIGH
36 to 60	3	MODERATE
21 to 35	4	LOW
0 to 20	5	MINIMAL

This instrument is directional and not calibrated. A composite of 36 sits one point above the Tier 4 boundary, and Rev A scored 34 inside Tier 4. A two-point swing is not a change in the security picture. **The finding is the band and the reason for it, not the number.** What carries weight here is that the score reproduced under a materially narrower evidence base.

07 NEIGHBORHOOD SENTIMENT

The lake reads as safe and busy, and the dominant public complaint is crowding rather than danger. That is a materially different signal from a corridor residents avoid, and it is the strongest sentiment finding available from public sources. The Lake Harriet loop trail carries more than 1,600 public reviews, with usage described as heavy.

Against that, coverage of the break-in wave captured the tension in the ring neighborhoods directly:

The neighborhood's own 2026 civic agenda is not about crime. Lynnhurst Neighborhood Association and Southwest Voices coverage through 2026 centers on the Lynnhurst Park master plan and the proposed removal of the wading pool, the Oliver Avenue storm sewer reconstruction, Penn Avenue bridge work, and Porchfest. PI assesses this as a meaningful negative indicator: residents organising around park amenities and construction, rather than around safety, is what a low-threat neighborhood looks like from the inside. [A]

"We think we live in a bubble here, but I guess not." Linden Hills resident, following a neighborhood break-in

Southwest Voices is the best local source identified. It covers East Harriet, Lynnhurst, Fulton and Linden Hills by name, uses City of Minneapolis data, and holds an explicit anti-fear-mongering editorial stance.

Not collected. The resident-forum layer remains entirely open and nothing above should be read as covering it. Nextdoor 55419 is login-walled. Reddit is not merely blocked in this environment: it refuses Anthropic's crawler outright, so no Claude session can reach it. Both require the owner's own browser. [?]

08 KEY ANALYTICAL FINDS

- **Three separate claims about this neighborhood proved misdated.** A carjacking cluster presented in Rev A as in-window is from **November 2021**. An MPD 5th Precinct aggravated-robbery warning describing victims "alone or with one other person, either walking," which reads as directly on point, cites Inspector Katie Blackwell, who left that command in **August 2023**. A search summary returned the band shell shooting as "October 2026" when the charging documents place it at **24 October 2023**. All three were excluded. PI assesses date verification, not collection volume, as the binding constraint on this assessment.
- **A vehicular threat vector was missing from the prior revision.** The 1 May 2026 East Harriet collision put a stolen car through a stop sign at 80 mph with its lights off, on residential streets inside the neighborhood, at night. The November 2020 parkway strike shows the same mechanism reaching a runner on the exact surface in question. This is now scored in Category B at 45.
- **Construction is active on the route corridor right now.** Storm sewer reconstruction on Oliver Avenue between W 50th Street and Lake Harriet Parkway began 13 July 2026 and runs into summer 2027. It changes footing, lighting and available line of sight on part of the route for the entire coming winter, which is the season the pre-dawn run is most exposed. The physical recon at Section 09 should be walked with this in place.
- **The property-crime pattern still does not threaten a runner, and Category C was not inflated on its account.** The 02:00 to 07:00 overlap stays scored at 28 as an *encounter* consideration. Those offenders target parked vehicles and disperse from people. Distance and disengagement, never confrontation.

09 COLLECTION GAPS

PRIORITY	GAP	STATUS AND ROUTE TO CLOSURE
HIGH	Incident-level data, quarter-mile radius, 365 days	Open. Geofenced query against the City ArcGIS FeatureServer (org_79kfd2K6fskCAkyg, layers crime_data_2025 and Police_Incidents_2026) could not be run: this environment's egress policy returns 403 for services1.arcgis.com and opendata.minneapolismn.gov. Query written and staged in COLLECTION-STATUS.md
HIGH	Two data practices requests, not one	Open. An MGDPA request to MPD Records covers the residential blocks and misses the parkway. A parallel request to MPRB is required (Responsible Authority: Jennifer Ringold). The MPRB draft includes a patrol-hours element for 04:00 to 07:00, which would measure the Section 02 seam rather than infer it
HIGH	Physical route reconnaissance	Open, owner-only. Walk or drive the route once at 05:30 in the current season, with the Oliver Avenue works in place. Lighting, sightlines, cover, footing, phone signal. Seasonally dependent: a summer recon does not answer a November question. This gap is why lighting is scored conservatively at 42
HIGH	Resident-forum layer	Open, owner-only. Nextdoor 55419 is login-walled and Reddit refuses Anthropic's crawler outright. Search strings staged in Annex A. Capture date and firsthand-versus-repost for every hit
MED	Predatory-offender proximity	Open. Minnesota DOC Level 3 registrant search and BCA non-compliant search against the address. Interactive lookups
MED	Ownership and occupancy conflict	Open. Hennepin County property and recorder portals

10 OUTSTANDING QUESTION AND SOURCES

The single open analytic question is the runner's own risk profile, which is not on record in this file and which determines how the Section 04 activity-matched precedents should be weighted. PI recommends resolving it before the assessment is treated as final. No other open item changes the tier.

Sources. Southwest Voices, East Harriet high-speed chase (May 2026), Lynnhurst and East Harriet neighborhood coverage (2026), auto theft and carjackings in Southwest Minneapolis (Nov 2021) · CBS Minnesota / WCCO, southwest Minneapolis car break-ins (10 May 2026), south-side vehicle damage (Apr 2026), Lake Harriet runner assault (2015), Harriet and Nokomis exposure series (2017), Aldrich Ave robberies (2023), band shell shooting (Oct 2023), Linden Hills purse theft (6 Sep 2024) · Star Tribune, Linden Hills and Minneapolis vehicle break-in coverage (2025 to 2026), Lake Harriet minivan strike (Nov 2020), band shell charging coverage · FOX 9 and KSTP, East Harriet collision and charging coverage (May 2026) · Southwest Journal, Lake Harriet minivan strike (Nov 2020) · KFGO, band shell charge (28 Oct 2023) · Patch Southwest Minneapolis, Linden Hills crime comparison (2026) · Minneapolis Park and Recreation Board, Park Police and Safety, Public Data, Park Police Incident Summaries · Lynnhurst Neighborhood Association · City of Minneapolis, Precinct 5 and Open Data portal.

Scope. Rev C is limited to the residence, the Lake Harriet parkway and the four ring neighborhoods (East Harriet, Lynnhurst, Fulton, Linden Hills) at the owner's direction. Citywide, statewide and national comparators carried in Rev B were removed in full, including the Major Cities Chiefs Association midyear figures and the Minnesota BCA Uniform Crime Report. They remain in Rev B for anyone who needs the benchmark. Incidents outside the ring were excluded by the same rule.

Source tags. [V] verified primary · [S] reliable secondary · [A] analysis · [?] gap. Consumer crime-score aggregators (CrimeGrade, AreaVibes, NeighborhoodScout, Niche, Safemap, SpotCrime, minneapoliscrime.com) returned mutually inconsistent neighborhood figures and are excluded throughout. Several were returned by searches conducted for this revision and were discarded rather than used.

Standing caveat. Absence of news coverage is not confirmation of safety. Every "none located" statement means no incident was reported in an accessible source, and nothing more. Four HIGH-priority gaps remain open at Section 09, two of which only the owner can close.

Typeface. Human BBY 45 Light specified, body at 7.95pt rather than the 11pt house standard to hold the matrix within the page budget. Substituted at render time where the family is unavailable.
