

Residential Threat Assessment FINAL

4889 East Lake Harriet Parkway, Minneapolis, Minnesota 55419. Events, news and crime activity within a 5-mile radius, trailing 365 days. Principal question: whether a solo run on the parkway at 05:30 is safe.

DOCUMENT PI-2026-RSA-001 · FINAL	WINDOW 14 Sep 25 to 14 Sep 26	RADIUS 5 miles	QUALIFYING ITEMS 18	ON THE PARKWAY 0	RISK TIER Tier 3 · MODERATE
--	----------------------------------	-------------------	------------------------	---------------------	--------------------------------

01 EXECUTIVE SUMMARY

TIER 3 · MODERATE · COMPOSITE 37 / 100

Eighteen qualifying items occurred inside the 5-mile radius during the 365-day window. None occurred on the Lake Harriet parkway. The nearest in-window item of any kind is a vehicle collision roughly one mile east. The nearest violent crime is roughly 2.5 miles north. The window opened on its worst two days: three shootings along Lake Street on 14 and 15 September 2025 killed three people and wounded roughly a dozen, about four miles from the subject address. It closed on a comparable note with a mass shooting near Loring Park on 2 September 2026 that killed three and wounded seven by gunfire, about four miles north. **Neither cluster reached this neighborhood, and neither is the reason for the score.** Removing the pre-dawn run drops the composite to 27, Tier 4 LOW. The run is the risk.

02 SCOPE, METHOD AND QUALITY CONTROL

Two filters, strict, applied in order. (1) Date: the event occurred between 14 September 2025 and 14 September 2026 inclusive, a 365-day span. Publication date never qualifies an item; only the event date does. **(2) Distance:** the event occurred within approximately 5 miles of the subject address. Distances are estimated from Minneapolis street geography and are approximate. No geocoding service was reachable from this environment. [A]

Every item was verified against a primary report before inclusion. That pass removed six items and corrected three factual errors, two of which had already been published in an earlier revision of this document. Section 07 logs all of it.

What this scope costs, stated plainly. A strict 365-day window removes the only exact time, place and activity match in the entire file: a solo runner grabbed from behind and chased at **05:30 on West Lake Harriet Parkway near Sheridan Avenue South, September 2015**. It also removes the July 2017 escalation series on this lake corridor, in which a man knocked a woman off her bicycle and assaulted her and a second man grabbed two women four days later, and the November 2020 minivan that left the parkway and struck a jogger.

Those three are the strongest activity-specific evidence that exists for this location. PI assesses the resulting picture as **less informative about the question being asked, not safer**. Category C is now carried by structural conditions rather than by precedent.

03 QUALIFYING ITEMS, SORTED BY DISTANCE FROM THE RESIDENCE

DATE	EVENT	LOCATION	APPROX BEARING ON THE RUN
13 Jul 2026	Storm sewer reconstruction begins on Oliver Ave between W 50th St and Lake Harriet Parkway, and on W 50th between Oliver and Penn. Scheduled into summer 2027	On the route corridor	on route Direct. Footing, lighting, detours
10 May 2026	Resident returned from a weekend trip to a smashed car window, nothing taken. Further break-ins reported the same Sunday in Kenny and Armatage	Lynnhurst, subject's own neighborhood	<0.5 mi None direct. Parked vehicle
1 May 2026	Thailand Taiwan Hawkins, 19, drove a stolen Hyundai through a stop sign at 80 mph with no headlights and struck a State Patrol squad, pinning the trooper. Trooper: fractured right fibula, fractured left scapula. One passenger: compound neck fracture and brain bleed. Charged with two counts of felony criminal vehicular operation, fleeing in a motor vehicle, and receiving stolen property. Told police it is "fun to drive around in stolen vehicles"	East Harriet, W 46th St and Aldrich Ave S	~1 mi Direct. Vehicular, residential streets, no lights
2025 to 2026	Overnight vehicle window-smashing reaches Linden Hills. MPD 5th Precinct investigations attributes the pattern to one juvenile group active citywide	Linden Hills	~1 mi None direct. Proximity
17 Jul 2026	Park Police responded to a person down on a park bench at 19:50	W Bde Maka Ska Pkwy and Rose Lane	~2 mi Parkway environment, not criminal
16 Aug 2026	Body recovered from the water in a severe state of decomposition, per Minneapolis Park Police	Bde Maka Ska	~2 mi Adjacent lake, cause undetermined
21 Jun 2026	Homicide. Dashon Lavell Amos charged with two counts of second-degree murder with intent. Police link the suspect group, known as "1500" or "Wayne City," to multiple shootings	2100 block Lyndale Ave S, Uptown	~2.5 mi Nearest in-window homicide
Late Aug 2026	At least 87 vehicles damaged in a single night across 9 locations between 02:00 and 07:00. No arrests announced at the time	Citywide, includes southwest	varies Offender window covers 05:30
24 Jan 2026	Alex Jeffrey Pretti, 37, a Department of Veterans Affairs intensive care nurse, fatally shot by a Customs and Border Protection officer during Operation Metro Surge. DOJ civil rights investigation opened	Nicollet Ave	~3 mi Street environment. Not street crime
27 Apr 2026	At least 30 vehicles damaged between 01:30 and 09:15, clustered within a mile of Lake Nokomis and Lake Hiawatha. 14 on one block at 24th Ave S and 57th St E	Nokomis and Hiawatha	~3 mi Offender window covers 05:30
7 Jan 2026	Renée Nicole Macklin Good, 37, fatally shot in her car by an ICE agent during Operation Metro Surge	Portland Ave S	~3.5 mi Street environment. Not street crime
8 Apr 2026	Two aggravated robberies minutes apart from 17:45. A man who had just parked and was walking toward a business was approached and assaulted by four juveniles in an apparent attempted carjacking. Four teens arrested, all with prior arrests for auto theft, assault or aggravated robbery	2600 block Park Ave	~3.5 mi Pedestrian target, on foot after parking
15 to 20 May 2026	Amos Ferrier, 38, an Army veteran, confronted two people attempting to steal his car outside his workplace, was thrown from the moving vehicle and died of head injuries. Two women, 18 and 19, arrested	5400 block 43rd Ave S	~4 mi Confrontation fatality. Supports disengagement

2 Sep 2026	Mass shooting at the Shoreline Plaza apartment building at 16:36. Three dead: Dale Henry Spry, 63, Muse Abdi Afrah, 61, and the gunman Carlton Neal Johnson II, 35. Seven people wounded by gunfire in total, spanning residents, building staff and responding officers. Officers Joseph Michnowski and Yahye Ahmed shot; a third officer cut by glass	15 E Grant St, Loring Park	~4 mi Largest in-window event. Building-specific
4 Sep 2026	Stolen vehicle pursuit ended in a crash into a Hennepin County Sheriff's squad. Smash-and-grab tools recovered. Four arrested, three juveniles and an 18-year-old	26th Ave S and E 9th St	~4 mi Direct. Vehicular
14 Sep 2025	Fatal shooting at 01:45. A man was found in the street with a gunshot wound and died; a boy was hospitalised with multiple gunshot wounds. Trevon Harris, 28, and Kenny Davenport, 50, charged with second-degree murder and attempted second-degree murder	15th Ave S and E Lake St	~4 mi Day one of the window
15 Sep 2025	Mass shooting just before noon. Five men found with gunshot wounds. Adam John Peterson, 46, died 20 September. No arrests; police described a quarrel that escalated to gunfire	E Lake St and Stevens Ave S	~4 mi Daylight, street environment
15 Sep 2025	Encampment mass shooting at about 22:00, more than 30 shots fired. Jacinda Oakgrove, 30, killed and six others injured. Charges describe a dispute over drug territory. The City cleared the encampment hours later	E Lake St and 28th Ave S	~4 mi Twelve hours after the item above

04 THE PARKWAY ITSELF

No violent incident, robbery, assault, or exposure report was located on the Lake Harriet parkway or its adjoining blocks at any point inside the 365-day window. The search was run repeatedly and from several angles: the parkway by name, the band shell, the boat launch, the rec center, MPRB Park Police incident summaries, and neighborhood press. Every Lake Harriet result returned either an incident from 2023 or earlier, or concert programming. The nearest qualifying item of any kind is the 1 May collision at roughly one mile.

This is a null result and it is reported as one. It means no incident was reported in an accessible source. It is not a certification that none occurred, and it cannot become one until the two data requests at Section 09 return. The City incident-level dataset, which is the record that would actually settle this question, could not be queried from this environment.

05 SCORED MATRIX

Factors score 0 to 100. Category score is the unweighted mean of its factors. Composite is the weighted sum. Category B is built on in-window, in-radius evidence alone. Scores below reflect the Section 07 corrections.

FACTOR	SCORE BASIS
A · SITE AND PROPERTY	31.0 Weight 25% · contributes 7.75
Structural and occupancy baseline	15 2020 construction, owner-occupied single family [V]
Target appeal: publicly marketed high-value residence	55 Full interior photography indexed against a named address [A]
Perimeter and approach exposure	24 Parkway frontage, open lakeside approach [A]
Ownership and occupancy record clarity [?]	30 Aggregator 2018 sale conflicts with active 2025 and 2026 re-listings
B · THREAT INTELLIGENCE, IN WINDOW AND IN RADIUS	35.2 Weight 32% · contributes 11.26
Ambient violent crime, immediate ring	10 Among the lowest-crime areas of the city [S]
In-window property-crime pattern within the radius	55 Lynnhurst direct hit, Nokomis 30-vehicle night, 87-vehicle night [V]
Verified in-window violent incidents on the parkway	8 None located across repeated searches. Floor reflects reporting gaps [?]
In-window violent crime within the radius	55 Lake St cluster (3 dead), Loring Park (3 dead), 2 federal shootings, Uptown homicide [V]
In-window vehicular threat on or near the route	48 1 May East Harriet collision, 4 Sep pursuit crash, Ferrier death [V]
C · VULNERABILITY AND ENVIRONMENTAL	42.9 Weight 43% · contributes 18.43
Activity exposure: solo, pre-dawn, full darkness	60 No companion, no witnesses, seasonal darkness for the whole run [A]
Route predictability	55 Fixed route at a fixed time. The most controllable factor scored [A]
Patrol coverage seam	48 MPD and MPRB boundary, Park Patrol weighted to summer [V]
Lighting and sightlines [?]	42 Unverified. Scored conservatively pending physical recon
Active construction on the route corridor	40 Oliver Ave and W 50th St works, Jul 2026 into summer 2027 [V]
Offender-presence window overlap	30 In-window sprees ran 01:30 to 09:15 and 02:00 to 07:00. Both cover 05:30 [V]
Communications and response	25 Populated residential corridor, carry-phone assumed [A]
COMPOSITE (0.25 × 31.0) + (0.32 × 35.2) + (0.43 × 42.9)	37 TIER 3 · MODERATE

06 BANDING AND TESTS

COMPOSITE	TIER	LABEL
81 to 100	1	CRITICAL
61 to 80	2	HIGH
36 to 60	3	MODERATE
21 to 35	4	LOW
0 to 20	5	MINIMAL

Score history: 34, 36, 36, 37, 37 final. Five scopes and one QC pass, one band throughout. A three-point spread is inside the instrument's noise. This is a directional indicator, not a calibrated instrument.

Sensitivity test. Hold A and B constant and reduce C to its ambient environmental residue of roughly 18, which is what remains once activity exposure, route predictability, construction and the offender window fall away and the patrol seam stops applying to a resident indoors at 05:30. The composite becomes **(0.25 × 31.0) + (0.32 × 35.2) + (0.43 × 18) = 27**, which is **Tier 4 LOW**.

Scope test. The score has been computed at neighborhood scope and at 5-mile scope and reproduced the same band. Widening from one to five miles moved the composite by one point. **Geography is not what drives this assessment. The behavior is.** That conclusion has now survived a deliberate attempt to break it.

07 QUALITY CONTROL LOG

Six items were removed on date. Each reads as current and on-point, and each would have inflated this assessment.

ITEM	APPEARS TO BE	VERIFIED AS
"5 of 7 carjackings ringing Lake Harriet, Nov 14 to 25"	In window	November 2021
MPD 5th Precinct alert, victims "alone or with one other person, either walking"	Current, precisely on point	Cites Inspector Katie Blackwell , who left that command August 2023
Band shell shooting	"October 2026" per a search summary	24 October 2023 per charging records
"Police report rise in crime along Lake Nokomis, Minnehaha Creek"	Current warning, on a creek that passes this lake	February 2021
"Three arrested after string of robberies in Uptown"	In window	September 2024
Linden Hills, "13 larceny and theft offenses, highest month in the past year"	August 2026 local trend marker	Patch article dates to 2022. Figure unsupported for this window
Three factual errors were corrected, two of which had already been published in an earlier revision of this document.		
• Published error. The Linden Hills August figure above appeared in Revisions C and D as a verified in-window trend marker. It is struck. Category B's property-crime factor drops from 58 to 55 as a result. • Published error. The 1 May collision passenger injury was recorded as a compound <i>leg</i> fracture. The charging record describes a compound neck fracture with a brain bleed. Corrected in Section 03. • Caught before publication. The Loring Park casualty figures were initially read as three officers shot plus four exposed to an airborne substance. Verified reporting describes two officers shot, a third cut by glass, and seven people wounded by gunfire in total. Section 03 carries the verified figures.		
PI assesses date and detail verification, not collection volume, as the binding constraint on this assessment. Nine separate corrections were required across six sources. Search result summaries proved unreliable on dates in particular, and every item in Section 03 was therefore checked against a primary report naming the event date.		

08 EXCLUDED ON DISTANCE, AND ONE NAMED EXCLUSION

The Annunciation church shooting is excluded, and it is named here so the omission is visible rather than silent. It occurred roughly 1.5 miles from the subject address, comfortably inside the radius, and it drives the MPD 5th Precinct year-over-year shooting-victim increase on its own. It happened on **27 August 2025**, eighteen days before this window opens. Under the filters set for this assessment it does not qualify. **Excluded on distance:** Elm Creek Park Reserve assault (Maple Grove, roughly 15 miles), the North Minneapolis pursuit crash at N Lyndale and 41st Ave N (roughly 7 miles), and the Boom Island and northeast Minneapolis break-in sites at or beyond the boundary.

09 COLLECTION GAPS AND OUTSTANDING QUESTION

PRIORITY	GAP	STATUS AND ROUTE TO CLOSURE
HIGH	Incident-level data, in-window, geofenced	Open, and it is the gap that would settle Section 04. The City ArcGIS FeatureServer (org 79kfd2K6fskCAkyg , layers crime_data_2025 and Police_Incidents_2026) supports a radius query directly. This environment's egress policy returns 403 for services1.arcgis.com and opendata.minneapolismn.gov . The query is written and staged in COLLECTION-STATUS.md and runs anywhere with egress
HIGH	Two data practices requests, not one	Open. An MGDPA request to MPD Records covers the residential blocks and misses the parkway, which is Park Board jurisdiction. A parallel MPRB request is drafted (Responsible Authority: Jennifer Ringold), including a patrol-hours element for 04:00 to 07:00 that would measure the coverage seam rather than infer it
HIGH	Physical route reconnaissance	Open, owner-only. Walk or drive the route once at 05:30 in the current season with the Oliver Ave works in place. Lighting, sightlines, cover, footing, phone signal. A summer recon does not answer a November question. This gap is why lighting is scored conservatively at 42
HIGH	Resident-forum layer	Open, owner-only. Nextdoor 55419 is login-walled. Reddit refuses Anthropic's crawler outright, so no Claude session can reach it. Search strings staged in Annex A. Capture the event date and firsthand-versus-repost for every hit
MED	Predatory-offender proximity	Open. Minnesota DOC Level 3 registrant search and BCA non-compliant search against the address. Interactive lookups

The single open analytic question is the runner's own risk profile, which is not on record in this file and which determines how heavily the pre-window activity-matched precedents at Section 02 should weigh against the clean in-window parkway record at Section 04. PI recommends resolving it before this assessment is acted on. No other open item changes the tier.

10 SOURCES

Star Tribune: Loring Park mass shooting, victims and gunman (Sep 2026), Lake Street shootings and second death (Sep 2025), vehicle break-in sprees (2025 to 2026), auto theft surge (2026). Hennepin County and MPD charging bulletins: Uptown homicide (Jun 2026), juvenile robbery arrests (Apr 2026), Stevens Avenue death notice (Sep 2025).

Scope. FINAL admits only events occurring between 14 Sep 2025 and 14 Sep 2026 within approximately 5 miles of the subject address. Publication date does not qualify an item. Distances are estimated from street geography and are approximate; no geocoding service was reachable from this environment. Revision C holds the neighborhood-scoped version and the pre-window historical record, including the September 2015 parkway assault, the July 2017 escalation series and the November 2020 jogger strike, none of which qualify here.

Source tags. [V] verified primary · [S] reliable secondary · [A] analysis · [?] gap. Consumer crime-score aggregators (CrimeGrade, AreaVibes, NeighborhoodScout, Niche, Safemap, SpotCrime, HomeSnacks, minneapoliscrime.com) returned mutually inconsistent figures and are excluded throughout. Several surfaced repeatedly during collection and were discarded rather than used.

Standing caveat. Absence of coverage is not confirmation of safety. The Section 04 null result means no incident was reported in an accessible source, and nothing more. Four HIGH-priority gaps remain open, two of which only the owner can close. This document should be read against them.

Typeface. Human BBY 45 Light specified, body at 7.0pt rather than the 11pt house standard to hold the event table and matrix within the page budget. Substituted at render time where the family is unavailable.
